The Alchemist

The Alchemist is a simple alchemy engine designed for games and applications. It allows you to create ingredients, tools, products, and procedures to simulate alchemical processes.

Features

- Ingredient creation and management
- Tool creation and usage
- Product creation through procedures
- Extendable and modular design

Installation

You can install the package via pip:

```
pip install thealchemist
```

Usage

```python
from the_alchemist.main import main

if __name__ == "__main__":
    main()
```
